LOU BIGGS.

The Democratic press boasts of the
passage of a rural credits law but fails
to point out how any man is to get
money under that law who could not
get it before, or how he is to get it un-
der any more favorable conditions.

The demonstration against Mexico
will serve one useful purpose, for the
democratic administration—all the big
appropriations can be charged up
against it.—Hampton Iowa Recorder

GARBER

While there is some appearance of
rain off to the south this morning, yet
it is very dry here, with a rain some to-
matoes might make a crop, and sorgh-
um would come out, of which there
was quite a lot planted for making up
this fall, but it looks now as if we will
have to use corn dope another year.

E. A. Drumm went to Western Kan-
sas last week to market some cattle and
may get home today, if he does not
make any other shipments.

W. W. Walden came up from Berg-
man Arkansas last Saturday, and seem-
ed to feel himself at home again. He
left Sunday evening on his way to
Branson from where he would go home
Monday.

J. F. Leckrone came in from west-
ern Kansas where he had been thresh-
ing for some time, and reports that H.
I. Sutherland John Gregg and Olie
Cummings would remain for sometime
longer and do farm work. Mr. Leckrone
says that 41 new threshers were
brought into that place where he was
and made short work of the threshing
business.

Mrs. Cory Boraker and children went
to Aurora Sunday evening to live where
her husband has plenty of team work,
and Mrs. Minnie and Laura Vining
went along for a few days visit with
friends.

J. W. Vining and John Laure re-
turned from a several days trip in the
Eastern part of Oklahoma and report
everything as dry there as here.

Lee Craig of Hollister came to Gar-
ber Sunday evening to join his wife
and mother on Fall creek for a day or
two.

After over two months stay in Garber
the bridge crew will move to Reeds
Springs the last of the week, until they
get more material to work with.

C. O. Bass has got his concrete cel-
lar completed, and has it ready to store
anything in for winter that he can get.

Hard Cox and son went to the river
Monday and brought back several
bushels of nice peaches for canning,
and reports that Will Cantwell will have
forty bushel of corn to the acre.

We have heard of several that will
have a fair crop of corn while their
nearest neighbor will have none owing
to the freakish showers of rain that fell
in spots.

There is some things that we can-
not understand, one is why is the
American soldiers, seven or eight
thousand of them kept in Mexico do-
ing nothing, while our state troops are
held on the border at big expense do-
ing nothing, when they might as well
be at home at work where they are
needed, perhaps it will be explained
after awhile.

Another thing is why the railroads
now are fighting the men's eight hour
day, when the at first reported in favor
of it, and as the men have elected to
take the President's solution and cut
out their time and a half demands.
Why can't the railroads come half way.

Another thing is why do all signs for
rain fall in dry weath. Just as we close
this epistle it is raining some and we
hope for the good of the country that
it will make it a soaker while at it.

BROWN BRANCH

We have had no rain yet, and every-
thing is burning up.

The S. S. and C. E. delegates who
attended the convention at Mt. Taber
say it was fine.

Miss Pearl Jenkins of Ava was the
guest of Mabel Dean last week.

Miss Mabel and Gladys Dean gave a
lawn party at Maple Dale Tuesday
evening, about thirty young people at-
tended. Refreshments consisted of
punch and wafers.

Ernest Dixon is slowly improving.
Several have gone down to Bradley-
ville to see the ruins of the fire which
occurred there last week.

Albert Dean has gone to St. Louis
with a load of cattle.

Mrs. Mary Brown of McClurg is vis-
iting Dr. Brown and wife.

Mabel and Gladys Dean and Pearl
Jenkins went to Bradleyville Wednes-
day.

Mr. and Mrs. Frank Spurlock and
children drove over from Ava in their
Ford last Tuesday and were the guests
of the McPherson family.

Mrs. Wiley Floyd is ill at the home
of her parents Mr. and Mrs. McPhers-
on.

Paul Watterson of Rome was buying
hogs in this vicinity last week.

Grover Upchurch of Ava, was a
guest at the Dunn home Sunday.

Mr. and Mrs. Middleton and son,
and some of their friends from Taney
ville passed through our town enroute
to Mountain Grove.

KIRBYVILLE

Someone said they put in an order
for a good rain some time ago, but we
can all say it must have been lost in
the mail, for when the cloud came, it
was undone and most of the rain had
spilled out before it arrived in this
community.

School opened at St. James this
morning. Mr. John Gladson will be
their teacher. Mr. Gladson was a
graduate of the S. of O. in 1915 and
made a second grade certificate in the
last teacher's examination where many
others failed. He and his mother have
moved to Kirbyville where they will
live for a while. We are glad to wel-
come them to our community for it
will be a great help to our community

Coming Back

UNITED DOCTORS SPECIALIST
WILL AGAIN BE AT

Branson, Missouri,

BRANSON, HOTEL.

Saturday, September 2, 1916

ONE DAY ONLY

Hours 9 a. m. to 6 p. m.

Remarkable Success of Talented
Physician in the Treatment
of Chronic Diseases.

Offer Services Free of Charge.

The United Doctors Specialist, licen-
sed by the State of Missouri for the
treatment of all diseases, including de-
formities, nervous and chronic diseases,
of men, women and children, offer to
all who call on this trip, consultation,
examination, advice free, making no
charges whatever, except the actual
cost of treatment. All that is asked in
return for these valuable services is that
every person treated will state the re-
sult obtained to their friends and thus
prove to the sick and afflicted in every
city and locality, that at last treatments
have been discovered that are season-
ably sure and certain in their effect.

The United Doctors are experts in
the treatment of chronic diseases and so
great and wonderful have been their re-
sults that in many cases it is hard to
find the dividing line between skill and
miracle.

Diseases of the stomach, intestines,
liver blood, skin, nerves, heart, spleen,
rheumatism, sciatica, tapeworm, leg
ulcers, weak lungs and those afflicted
with long-standing deep seated, chro-
nic diseases, that have baffled the skill
of the family physicians, should not fail
to call. Deafness often has been cured
in sixty days.

According to their system no more
operation for appendicitis, gall stones,
tumors, goiter, piles, etc., as all cases
accepted will be treated without opera-
tion or hypodermic injection, as they
were among the first in America to
earn the name of "Bloodless Surgeons,"
by doing away with the knife with
blood and with all pain in the success-
ful treatment of these dangerous dis-
eases.

No matter what your ailment may be
no matter what others may have told
you, no matter what experience you
may have had with other physicians,
it will be to your advantage to see
them at once. Have it forever settled
in your mind. If your case is incur-
able they will give you such advice as
may relieve and starve the disease. Do
not put off this duty you owe yourself
or friends or relatives who are suffering
because of your sickness, as a visit at
this time may help you.

Worn-out and run-down men or
women, no matter what your ailment
may be, call, it costs you nothing.

Remember, this free offer is for a
visit only.

Married ladies come with their hus-
bands and minors with their parents.
Laboratories, Milwaukee, Wisconsin.

in a social way. The people of St.
James are anticipating a good school.

John McClurg and family passed
this place Sunday on their way to visit
Mrs. Dick Smith who is seriously ill.
She has been at her mother's visiting
for 3 weeks. Her home is in Oklaho-
ma.

Frank Perrett has returned from
Madison, Okla., where he has been
driving a team. He has been almost
sick for about 3 weeks as a result of
drinking gypsum water. He says that
things are burned up worse there than
here.

PINE OP

Mrs. Bert Bu- and Miss Carrie
Surrend went to W. City last week
to visit relatives.

Miss Lorene Hantley spent last
week with her sister Mrs. A. E. Creed-
on of Burlington, Ark. Jap Barnwell
is spending a few days visiting Harvey
Kelly.

Joe Powers and family went to visit
Mrs. Powers father W. F. Ryan over
Sunday.

J. C. David has bought John Ham-
monds' saw mill and will move to Ark-
ansas soon.

Ben Pruitt is going to move to Oma-
ha next week.

Robert Powers and family visited at
the home of Tuck Collins near Melva
last Sunday.

There will be an old settlers picnic

Dollars and under will be cash in hand. All property must be settled for before being removed
from the premises.

J. L. Baird and L. B. Warren.

WILL ADAMS, Clerk.

M. C. GRANT, Auctioneer.

WHEN EDITOR WAS DOCTOR

English Provincial Newspaper Offices
Once as Matter of Course Equipped
With Medicine.

Keene's Bath Journal, which ceased
publication recently, was one of the
oldest weekly newspapers in the prov-
inces, says the London Times. Known
as the Bath Journal, it was founded in
1742 by Thomas Roddeley, whose por-
trait in wig and ruffles, by Hoare,
forms a picturesque reminder of the
period. His daughter married John
Keene, the Journal from this union
passing on to and through a succession
of Keenes, hence its title Keene's Bath
Journal.

As was the custom in bygone days
patent medicines were sold in provin-
cial newspaper offices, and the drawers
in which the pills and medicines were
kept at the Journal office were until
recently in their original positions. It
was nothing unusual for the editor in
the throes of writing his editorial to
have to step down from his seat to
serve a box of pills.

The pages of the Journal were for a
long period largely taken up by ad-
vertisements of various "cure alls."

Australian Aborigines.

The question to what grand division
of the human race the aborigines of
Australia belong has been long dis-
puted by ethnologists. The native Aus-
tralians are black, which led many
to class them among the negro races;
but later investigators, considering
their features, their straight or curled
not woolly hair, and their heavy
beards, classify them, along with the
Veddahs of Ceylon and the hill tribes
of India, as Caucasians. If this classi-
fication is correct, we see, stretching
from Iceland to Australia, i. e., more
than half-way around the globe, a long
belt in which are found nations of all
colors and all grades of culture, from
the blond Iclander to the black Aus-
tralian, and from the highest product
of twentieth century civilization to a
condition comparable to that of the
cave dwellers of prehistoric Europe.
The Australians, when first discovered
by white men, were at the lowest state
of development, as regards civilization,
of any known human race.—The Chris-
tian Herald.

Secret of Film Pictures.

An unlimited number of positive
films of moving pictures can be made
from a single photographic negative.
After positives of sufficient number to
supply the exchanges throughout the
country have been made, the negative
is usually kept by the producing com-
pany. Additional positives can be
made at any time.

The pictures that appear in a
scratched condition are films that have
been exhibited considerably. These

"second-run" films usually cost the ex-
hibitor less than the films when they
are first released. The life of the films
is usually sufficient to supply the de-
mand of the theaters without printing
additional positives.

Culinary Mechanics.
"What air them kitchenettes I hear
tell of in the cities?" asked Deacon
Hyperbole Medders, the somewhat
honest agriculturist.

"They're the places, Uncle Hy," ex-
plained Upson Downs, his city nephew,
"in which are molded or cast or some-
how produced a flat-dweller's daily
round of mealettes."—Judge.

Philosophy That Failed.

"I don't see Si Perkins any more at
the grocery lyceum."
"Si sorter lost caste. He was setting
on a cracker barrel arguing that life
wasn't worth living. A lamp exploded."
"Well?"
"Si was the first man out."—Louis-
ville Courier-Journal.

HE'S POSSUM OF SNAKE TRIBE

Spreading Adder Seeks to Terrify, but
Really is Nothing More Than a
Big Bluff.

He's a sly creature, this snake. When
he's discovered and trapped he'll make
such a hullabaloo about it, with his
hissing and contortions, that if you're
not wise to the fact that he's only
bluffing you're sure to be frightened,
says the Philadelphia North Ameri-
can. If you're acquainted with him,
however, and refuse to run, he'll give
one final twist and roll over on his
back. Just as though he had made up
his mind to die and save you the trou-
ble of killing him. But don't be fooled.
He's only playing possum. He's the
spreading adder.

His tricks have resulted in all sorts
of wild stories about him. Many peo-
ple believe he's poisonous, because
he spreads his head out flat and hisses
when he's disturbed. As a matter of
fact he couldn't hurt you if you
picked him up by the head. He's only
bluffing when he hisses.

Then there's another story about the
spreading adder to the effect that he
will bite himself and fall over dead.
This belief comes from his habit of
playing possum when he sees he's cor-
nered and can't escape.

The spreading adder is about thirty
inches long, a reddish-brown and
blotched and spotted. He lives in dry
woods and on sandy hillsides, and eats
toads and insects. He's also called
the blowing viper or the hog-nosed ad-
der.
